SHOCKWAVE THERAPY FOR ERECTILE DYSFUNCTION

Inclusion criteria: erectile dysfunction existing for more than 6 months and/or one or more from the next criteria: metabolic syndrome, hypercholesterolemia, hypertension, diabetes, and atherosclerosis

Frequency: Two treatments per week for 3 weeks.

May repeat another 6 treatments over 3 weeks, if necessary, when a break of at least a month has been given and there is an improvement of more than 50%, but not yet satisfactory.

Expectation/Results: 1-6 months should be given for new arteries to form, which depends on the patient's individual response, general health and duration and severity of symptoms.

Cost: R875 per session (includes all materials used)

Kind Regards

Charl de Kock
